

Komtech's new **Poly-Tech® Binder Posts** and Drive Caps are the money-saving, modern alternative to old fashioned and expensive metal **screw posts** for use in sample books and other industrial fastening applications.

When you compare metal **screw posts** to **Komtech's** new **binder post** system, you'll find:

Poly-Tech® posts cost much less than **metal posts** and **screws**.

- **Assembly** is FIVE TIMES FASTER! Saving you time AND money
- **Poly-Tech®** Drive Caps are easily installed with just the tap of a hammer
- For permanent **locking caps**, specify Part Number 0660 or 2011
- For removable caps order Part Number 0638 or 0648
- **Poly-Tech®** posts don't scratch table tops or stain operators' hands
- Available in many stock and **custom colors**
- For jobs that still need a "metal look," brass or nickel plated drive caps (Part No. 2011) can be used.

All dimensions are nominal. Numbers in parenthesis represent millimeters
